

21 *Dr. Grant Irwin House* *1656 Maine Street*

This imposing patterned-brick Queen Anne house was built in 1896. As is clear from this example, the Queen Anne style borrowed more from medieval models than from the early 18th century. The Prairie Style sun porch added to the west side in 1921 was designed by Quincy architect Ernest Wood. Dr. Irwin graduated from Quincy Medical College in 1886, and served as physician in charge of St. Mary's Institute for six years.
